

SeeSnake® LT1000

Laptop Interface System

NEW

The SeeSnake® LT1000 Laptop Interface allows you to leverage the power and flexibility of a Laptop with your SeeSnake reels. By using a Laptop as a monitor, your recording and monitoring options are as powerful as your PC. Digital recording, DVD burning, Wireless Transmission and Online Hosting are all possible with the LT1000 and a Laptop. Paired with a Ruggedized Laptop, the LT1000 is the most powerful and flexible system on the market.

- **Ultimate Flexibility** in recording, monitoring and reporting. Unlock the power of your Laptop to Monitor, Record and Communicate with SeeSnake HQ and RIDGIDConnect.
- **Clean Keys Control Pad** allows you to keep gloved hands off your Laptop while controlling camera recording and operation during an inspection.
- **Battery Powered Freedom** lets you perform inspections without the availability of AC power.
- **Laptop Stabilization System** allows you to secure and stabilize your Laptop on the reel for protection in the field (full LT1000 System only).
